

The Lima Times-Democrat.

THE LIMA TIMES-DEMOCRAT PUBLISHED.

THE LIMA TIMES-DEMOCRAT is published every Friday (except Sunday) and will be delivered to your paper table each evening upon the following terms:

One copy, one year, in advance, \$1.00
Six months, in advance, .50
By carrier, per week, 10 cents.

OFFICE—TIMES BUILDING,
No. 321 North Main Street, Lima, O.
TELEPHONE CALL, No. 84.

LARGEST CIRCULATION IN LIMA.

Postage Prepaid Anywhere in United States.

Subscription collections made weekly. Our collector will call each week unless some special arrangement is made with him. All subscription accounts must be paid promptly.

All foreign subscriptions must be paid in advance.

The Times-Democrat has the largest circulation of any daily newspaper in North America. It is published every day except Sunday and public holidays. It is a paper of the people, for the people, and by the people. It is the most powerful newspaper in the city. It is the only paper that is read by every one. It is the only paper that is read by every one. It is the only paper that is read by every one.

ONE DOLLAR PER YEAR IN ADVANCE.
Subscriptions not paid in advance will be discontinued at the end of the year. Address all communications to THE LIMA TIMES-DEMOCRAT PUBLISHING CO., Lima, Ohio.

The inhabitants of Southern Ohio are revelling an excellent sleighing the snowfall there having been much heavier than in this region.

The Ohio State Sinking Fund Commission filed its report with Governor McKinley last Friday. The Public funded debt is now \$2,045,885, and bears 3 per cent. interest. The last installment, \$360,000 is due in 1900.

The work of preparing for the collection of the income tax goes on without reference to Broker Moore's injunction suit. Not many Lima people will be affected by the law, as there are not many incomes in the city amounting to over \$4,000 per annum.

It is said that Senator Sherman, whose thriftiness has never been excelled by any man in public life, owns one half of the square of ground which a bill introduced by Senator Quay proposes to purchase for \$1,000,000 to be used as a site for a residence to be erected for the President of the United States. There is no doubt about the President needing a residence, but there is much about the passage of Senator Quay's bill.

Some of ex-Speaker Reed's friends say that he considers himself far in the lead in the race for the Republican Presidential nomination, and that he has no fear of either Harrison or McKinley, but thinks he may be defeated by some dark horse, such as Senator Allison or Gov. Norton. Democrats would prefer the nomination of either of the first three men, if they had any say in it. Either of them would be easier to beat than Allison or Norton, because of enemies in their own party.

Chairman Wilson, of the House ways and means committee, expects that his bill for the repeal of the differential duty imposed on sugar imported from those countries which pay an export bounty will be reported to the House and passed on after the recess. This is the duty that Germany claved to as a violation of the "most favored nation" clause of the treaty with this country, and which many believe to be partially, if not wholly, responsible for the action Germany has taken, and has caused Denmark to take, against American meat. There is little doubt that this bill ought speedily to become a law, but as Senator George said of what the Senate would do after the recess, "the business transacted will be what a small minority of this body decide what it shall be."

The message of the Governor of Pennsylvania shows some figures which, coming to the knowledge of workingmen should cause them to think seriously and earnestly before engaging in any strike, for according to this authority they are much more disastrous to the laboring men than to the employers. Governor Pattison's message says that of 67 strikes of organized labor during the year 1893, the loss to the workingmen is \$1,395,423.75, while the actual loss to employers is estimated at \$131,050. Another feature of the message is very instructive. The serious strikes of 1894 were caused, as he says, by "a population alien to our laws and languages," and resulted in the loss of both life and property. Another lesson worthy of the soberest consideration is given in the single statement that of the 27 labor strikes that occurred during the year 1894, only three succeeded in obtaining the purpose for which the strike was inaugurated. These are stubborn facts—and facts are conclusive against theories of the time.

THREE CLOSE CALLS.

NARROW ESCAPES DURING WORKMEN'S STRIKE.

One of them crushed to a shapeless mass between iron rollers—Another whirled around on a belt—Thrilling suspense with a log jam.

"I never hear of persons narrowly escaping death or surviving extraordinary injuries," said the New York representative of a big pulp mill company, "that I do not think of some remarkable instances of the kind that have occurred at one of our mills in the northern part of this state. On one occasion a workman named Wolf was engaged in cleaning a machine used at a certain stage in the process of pulp manufacture. The principal feature of this machine was two very heavy iron rollers—some above the other. When in operation, the upper roller was pressed close down on the lower one, and they revolved in opposite directions. To clean these rollers the upper one was raised seven or eight inches, the machine of course being at rest.

"In the course of his work Wolf, who was a young German, took his head and shoulders between the rollers to see better to clean the lower roller. While he was in that position some careless person turned on the water power. The rollers started at once, and before the alarm could be given and the water turned off Wolf was drawn clean through between the rollers and dropped on the other side, as much like pulp, so far as appearances went, as anything could be. I happened to be in the mill at the time, and I saw the frightful mishap.

"I ran to where the limp form of the workman lay and dispatched a messenger at once for a doctor, merely as a matter of form, however, for that anything could be done for the shapeless mass of humanity was beyond my mind. It was impossible to lift the body. We shuffled it on to a blanket and carried it to the unfortunate man's home. I noticed that, although there was not the slightest evidence of consciousness, Wolf was still breathing and that his heart was beating. When the doctor arrived he declared that from the condition down there was positively not a single whole bone left in Wolf's body. He said there was not one chance in ten thousand of the man living.

"It would take 10 doctors a week to set his bones," he said.

"The incensed body in plaster from the neck down, and which he came next day was amazed to find that Wolf was still alive and had regained consciousness. Wolf lay incased in plaster for several weeks. His bones knit and grew together again, but in such a way that when he was able to get around he was covered with knots and ridges. He had a few angles from head to feet. But he was alive. He was our night watchman for 10 years after that and is alive today.

"Another time a workman in a different part of the mill named Sammen was caught in a big belt, by a fork apron, and before the works could be stopped he was whirled seven times around the pulley, striking the ceiling with tremendous force each time. He was taken up for dead. I examined him before the doctor came, and there wasn't even the sign of an artery or mark on his body. The doctor came later, when the doctor came, when he was black as coal all over. There wasn't a spot on him that was not discolored. The doctor examined the man carefully, and to his amazement found that there was not a bone broken anywhere about him. His injuries were all skin and flesh. He was carried away within two days. Yet he had passed seven times through a space between the pulley and the beam not over seven inches wide.

"Once the dam of one of our mills became so clogged with logs that they interfered with the water power. It was necessary to release the jam or else the dam would burst, and the work would endanger the lives and limbs of all who engaged in it, and volunteers were asked for, handsome extra pay being offered. Plenty of men were ready to take the logs, among them Pat O'Brien, an Irishman, 31 years old. He insisted on being carried to the dam and joined it against the protest of the superintendent.

"The work of releasing the log jam went all right until the key log that held the main jam was to be removed. There lay the danger. The key was removed, and the men made a wild dash to escape. One of them, who was on the way but found among them the old Irishman Pat O'Brien. These four were caught among the logs and went over the falls, a sheer descent of 80 feet. Men and logs went over together, and everybody supposed that the men would be ground to atoms. But a most astonishing thing happened. In falling a number of logs fell on Pat and in a group, their upper ends toppling together, forming an almost perfect tent, or peaked hut, with the down stream side open. The men had escaped injury, not only from the logs in the fall, but from the tremendous plunge itself, and it was they who landed in the water below the tent of logs formed with them beneath its shelter. This saved them from being drowned by the water that plunged down from the great height.

"There was constant danger of the shelter of logs being forced from its lodgment by the pressure of water. In view of the latter danger, when it came to rescuing them, the three young men of the party urged old Pat O'Brien to be hauled up first. He obstinately refused to be hauled up until his companions had been rescued, when he took his chance and was landed safely above. He had scarcely been lifted above the shelter of the logs when it gave way, and the logs went crashing and thundering down the stream. I have heard of wonderful escapes of death, but never anything so wonderful as that."—New York Sun.

The football cry of the Augusta (Ga.) college is amusing: "Hobbs, gobble, rattle, dabble, aim, boom, ah, Augusta, Augusta. Ratt, ratt, ratt!"

Among tales of red tape the following should hold a high place: Mr. Roger Cavallion, a young French gentleman rider, who had won his hundredth steeplechase, was drawn for the conscription and had to serve for a year. He asked to be placed in the cavalry, explaining with due modesty that he was not unknown as a horseman. The military council of revision refused the request on the ground that as his period of service was only one year he would not have time to learn to ride. —Fall Mail Budget.

I LOVE WERE KING.

A LOVE STORY OF THE WORLD.

It is a story of the world's love and hate, of the world's joy and sorrow, of the world's hope and despair. It is a story of the world's love and hate, of the world's joy and sorrow, of the world's hope and despair. It is a story of the world's love and hate, of the world's joy and sorrow, of the world's hope and despair.

OVERBOARD.

They were homeward bound from Ohio, and they had run the Assyrian (Black Star clipper) till she could not run any longer, because the big sea, running faster than she did, caught her and tried hard to swamp her.

They would have done it, too, only her skipper, Dan Leary, to the windward 90 miles to the south of the Horn. She lay there like a duck, and after the first big snort, when the helm was put up, as dry as a cork.

It is not every ship that will do this. But the Assyrian was one of them. She rode gently up one watery slope and down the next yawning valley—down, till her white gallant cross-trees looked black in the shadow cast by the green hill, then up again into the cold sunset's beam.

The wind howled and shrieked through the rigging, and the sea came up on all sides, as much like pulp, so far as appearances went, as anything could be. I happened to be in the mill at the time, and I saw the frightful mishap.

"I ran to where the limp form of the workman lay and dispatched a messenger at once for a doctor, merely as a matter of form, however, for that anything could be done for the shapeless mass of humanity was beyond my mind. It was impossible to lift the body. We shuffled it on to a blanket and carried it to the unfortunate man's home. I noticed that, although there was not the slightest evidence of consciousness, Wolf was still breathing and that his heart was beating. When the doctor arrived he declared that from the condition down there was positively not a single whole bone left in Wolf's body. He said there was not one chance in ten thousand of the man living.

"It would take 10 doctors a week to set his bones," he said.

"The incensed body in plaster from the neck down, and which he came next day was amazed to find that Wolf was still alive and had regained consciousness. Wolf lay incased in plaster for several weeks. His bones knit and grew together again, but in such a way that when he was able to get around he was covered with knots and ridges. He had a few angles from head to feet. But he was alive. He was our night watchman for 10 years after that and is alive today.

"Another time a workman in a different part of the mill named Sammen was caught in a big belt, by a fork apron, and before the works could be stopped he was whirled seven times around the pulley, striking the ceiling with tremendous force each time. He was taken up for dead. I examined him before the doctor came, and there wasn't even the sign of an artery or mark on his body. The doctor came later, when the doctor came, when he was black as coal all over. There wasn't a spot on him that was not discolored. The doctor examined the man carefully, and to his amazement found that there was not a bone broken anywhere about him. His injuries were all skin and flesh. He was carried away within two days. Yet he had passed seven times through a space between the pulley and the beam not over seven inches wide.

"Once the dam of one of our mills became so clogged with logs that they interfered with the water power. It was necessary to release the jam or else the dam would burst, and the work would endanger the lives and limbs of all who engaged in it, and volunteers were asked for, handsome extra pay being offered. Plenty of men were ready to take the logs, among them Pat O'Brien, an Irishman, 31 years old. He insisted on being carried to the dam and joined it against the protest of the superintendent.

they could do nothing more than uselessly throw life buoys and henceover board, and watch through contracted eyes, with little means of pity. One can do no more, have to in the southern ocean, with a 40-foot sea running.

"God help him!" said the skipper, "He was a good man, and his ship the glass with a snap, giving the second mate a look that meant mischief.

"He's riding high," said the chief officer, peering. "The wind that kept him up isn't out of his clothes yet. But the birds are at him. Poor beggar! There's one big brute and on his head, and a wicked sort of move of men toward the second mate, standing aloof and sullen.

The captain had walked away aft and was staring up at the Irish pennant, still fluttering from the slackened brace. The chief still peered through his glasses. Seeing murder in many eyes, the second mate gave a loud cry and snatched an iron belaying pin out of the rail.

The cry was echoed by one of amazement from the chief, who, dancing with excitement, roared: "He's gripped him! Stand by all hands with your bowlines! Here he comes like a house afloat! Ho-ay!"

And the men yelled again and fell to knocking bowsprit furiously as they looked and saw Dan brown breast high out of the water, hanging on like grim death to the legs of a huge albatross, towed up one green rope and down another, with a few words from the boss the other day, sought to make the most of the opportunity by introducing domestic affairs.

Now, the most important factor in the bright young man's domestic affairs just now is a new baby, and this baby was lodged into the chat with the boss, and the important information imparted by the fond father was that the little one had three teeth.

"How did you say it was?" asked the employer, assuming great interest in the case.

"Five months, sir," was the reply. "Oh, come, now, Ed. That won't do. Five-month-old babies don't have teeth. You must be mistaken about the age."

"No, I'm not, sir. I guess I ought to know."

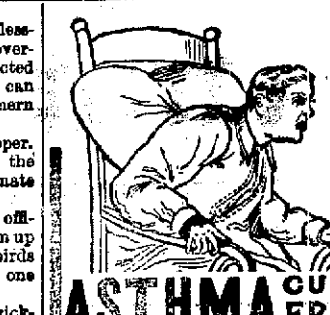

Then followed an animated conversation in which the employer endeavored to impress upon the employee that it was an utter impossibility for a 5-month-old child to have three teeth, while the fond young father insisted that it was his child and he ought to know. The controversy concluded by the employer dismissing the subject with the remark, "You may be right about the child's age, but you must be wrong about the teeth."

Having thus indulged in a little sociability the employer thought no more of the matter. Note the fond father. He didn't feel good over the fact that his child had three teeth at 5 months, especially as a number of his fellow employees had heard the debate. On going home at the close of his day's work he told his wife of the discussion, and she, like the fretful porcupine, had all quilts set instantly. "I'll prove it to him," she muttered that night just before going to sleep. Next day the big business man's wife called on him with a lady friend, and the two ladies were sitting in the private office chatting with the big business man when the office boy announced:

"A lady with a baby to see you, sir."

Before anything could be said she walked right in, and without noticing the ladies she said:

"Here's my baby, Mr. Blunk. I'm its mother, and I know it is just 5 months and 3 days old."

ASTHMA CURE.

HIMALAYA CURE
Nature's Cure for Asthma, Hay Fever, Coughs, Croup, Whooping Cough, Sore Throat, and all other respiratory ailments. It is a powerful and reliable remedy, and is sold by all druggists.

BABY HAD THREE TEETH.

Not in Proving This Father Nearly Caused a Domestic Sensation.

He is very prominent in business circles and a very busy man, but he finds time occasionally to get acquainted with his clerks, and one of his bright young men, finding him- self favored with a few words from the boss the other day, sought to make the most of the opportunity by introducing domestic affairs.

Now, the most important factor in the bright young man's domestic affairs just now is a new baby, and this baby was lodged into the chat with the boss, and the important information imparted by the fond father was that the little one had three teeth.

"How did you say it was?" asked the employer, assuming great interest in the case.

"Five months, sir," was the reply. "Oh, come, now, Ed. That won't do. Five-month-old babies don't have teeth. You must be mistaken about the age."

"No, I'm not, sir. I guess I ought to know."

Then followed an animated conversation in which the employer endeavored to impress upon the employee that it was an utter impossibility for a 5-month-old child to have three teeth, while the fond young father insisted that it was his child and he ought to know. The controversy concluded by the employer dismissing the subject with the remark, "You may be right about the child's age, but you must be wrong about the teeth."

Having thus indulged in a little sociability the employer thought no more of the matter. Note the fond father.
